

Life School Announces New Emergency Messaging System

Life School is proud to announce the implementation of a new messaging system to provide information on school closings and emergencies to our parents through means such as telephone calls, SMS text messages and emails. The *SchoolMessenger* system is used by school districts across Texas and the United States to provide a fast and efficient delivery system of this important information to our parents. According to Life School Executive Superintendent Brent Wilson, "Parent communication is extremely important to Life School. We are excited to implement this solution to help increase communication to our parents when school closings or emergencies occur."

On **Saturday, January 21st at 1:00 p.m.**, Life School will conduct a test of the new *SchoolMessenger* system. A test phone call and email will be sent to our parents. Also, a SMS text message will also be sent to parents giving them the opportunity to opt-in to the SMS text message service. To receive these messages, text the word "yes" to "68453." Standard phone carrier rates may apply. Please note, if you do not opt-in to use this service, you will only receive email and phone messages from the *SchoolMessenger* system.

Since the contact information for this system is taken from our student information database, it is important for parents to keep their contact information updated with their campus office. If you do not receive the test messages, please update your contact information by completing the "Change of Address and Phone Number" form contained in the link below and return it to the school office or classroom teacher.

The *SchoolMessenger* communication system is yet another way Life School is continuing to increase and improve communication with our parents.
